

RESTOTM

Technical Product Data

a) Product Name	PVA BONDING COMPOUND
b) Reference Number	P.P.28
c) Product Description	This versatile product has been formulated for general usage in the building and decorative industry, in diluted form it can be used to stabilise porous substrates such as plaster, concrete, plasterboard etc. Use 5 parts water to 1 part P.V.A Bonding Compound. When bonding render coats for repair work pre-coat the area with 3 parts of the compound to 1 of water and apply the plaster before the compound dries. By adding equal amounts of water and the compound to the Mortar / Concrete mix a significant improvement in adhesion and tensile flexural strength will be achieved.
d) Uses	To enhance the adhesion of plaster render and mortar mixes.
e) Pack Sizes	5 litre, 10 litre and 25 litre.
f) Specific Gravity	1.03
g) Solids	39.50
h) Flash Point	N/A
i) Drying Time	3 hours
j) Overcoating Time	30 minutes
k) Lowest Application Temperature	5 °C
l) Methods of Application	Normally by brushing
m) Storage Life	12 months
n) Thinner / Cleaner	Water
o) Precautions	Protect from frost
p) Safety	Refer to health and safety data sheet.
